ACL IGN400-PM Ignition Module

Model: ACL IGN400-PM

The ACL IGN400-PM Ignition Module is designed to light and monitor a pilot, reacting quickly to a loss of flame and acting to relight the pilot. It uses a single flame rod for both Ignition and Flame sensing, displaying the flame signal strength on the display and with LED indication. The Ignition Module can also monitor a main flame using a second Ignitor rod.

Flame signal strength displayed

LED indication of pilot, main, and flame fail

Flame-out response time of < 1 second

100% Fail-safe design

Power supply 12VDC

12VDC Valve and Alarm signal outputs

Optional Main flame sensing

One, Three, and Multiple Try Versions available

Approvals
